| Application                | NIR DYE                                                                                                                                                                                                                                                       |
| Product Description        | ICG PEG4-Alkyne is a copper (I)-catalyzed azide-alkyne cycloaddition (CuAAC) reagent of near infrared (NIR) fluorescent dye and used to generate a stable fluorescence signal in bioimaging. The alkyne reactive group is connected to ICG through a tetra... |
