| Immunogen                  | Recombinant full-length human HDAC1 protein                                                                                                                                                                                                                   |
| Product Description        | In the intact cell, DNA closely associates with histones and other nuclear proteins to form chromatin. The remodeling of chromatin is believed to be a critical component of transcriptional regulation and a major source of this remodeling is brought a... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [PCRP-HDAC1-1B7]                                                                                                                                                                                                                                              |
| Molecular Weight           | 60kDa                                                                                                                                                                                                                                                         |
