| Species Reactivity         | Human, Mouse                                                                                                                                                                                                                                                   |
| Immunogen                  | Recombinant full-length human TYRP1 protein                                                                                                                                                                                                                    |
| Product Description        | It reacts with a 75kDa melanocyte-specific gene product, identified as Tyrosinase-related protein-1 (TRP-1). It is involved in melanin synthesis. TRP1 is present on the melanosomal membranes of melanoma, normal melanocytes and nevi. Recent evidence su... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                     |
| Clone Designation          | [TYRP1/807]                                                                                                                                                                                                                                                    |
