| Host                       | Rabbit                                                                                                                  |
| Category                   | Antikörper                                                                                                              |
| Application                | ELISA, WB                                                                                                               |
| Species Reactivity         | Human                                                                                                                   |
| Immunogen                  | Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hsRANK Receptor (human sRANK Receptor). |
| Conjugation                | Biotin                                                                                                                  |
| Clonality                  | Polyclonal                                                                                                              |
| Concentration              | batch dependent                                                                                                         |
| NCBI                       | <a href="#">8792</a>                                                                                                    |
| UniProt                    | <a href="#">Q9Y6Q6</a>                                                                                                  |
| Form                       | Lyophilized                                                                                                             |
| Application Dilute         | Centrifuge vial prior to opening.                                                                                       |

Application Notes

ELISA: Sandwich: To detect hsRANK Receptor by sandwich ELISA (using 100 µL/well antibody solution) a concentration of 0.25 - 1.0 µg/mL of this antibody is required. This biotinylated polyclonal antibody, in conjunction with our Polyclonal Anti-Human sRANK Receptor (XP-5275) as a capture antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hsRANK Receptor. Western Blot: To detect hsRANK Receptor by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 µg/mL. Used in conjunction with compatible secondary reagents the detection limit for recombinant hsRANK Receptor is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.
