| Alternative Catalog Number | BCL-BCA-28-100                                                                                                                                                                                   |
| Manufacturer               | baseclick                                                                                                                                                                                        |
| Category                   | Biochemikalien                                                                                                                                                                                   |
| Product Description        | With this phosphoramidite it is possible to introduce alkyne modified A in the oligonucleotide. After standard solid phase synthesis, the final oligo is ready for subsequent click reaction.... |
| Molecular Weight           | 846.95 g/mol                                                                                                                                                                                     |
| Form                       | solid                                                                                                                                                                                            |
| CAS Number                 | [1269636-33-0]                                                                                                                                                                                   |
| Formula                    | C47H55N6O7P                                                                                                                                                                                      |
| Application Notes          | oligo synthesis building block                                                                                                                                                                   |
