| Species Reactivity         | Human                                                                                                                                                                                                                      |
| Immunogen                  | Recombinant protein (or fragment). This information is considered to be commercially sensitive.                                                                                                                            |
| Conjugation                | Unconjugated                                                                                                                                                                                                               |
| Product Description        | This gene encodes a mitochondrial flavoprotein that initiates electron transport for cytochromes P450 receiving electrons from NADPH. Multiple alternatively spliced transcript variants have been found for this gene.... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                 |
| Molecular Weight           | 54kDa                                                                                                                                                                                                                      |
| NCBI                       | <a href="#">2232</a>                                                                                                                                                                                                       |

|                    |                                                                                                                                                                                                                                                                   |
