| Product Description        | This gene encodes a G-protein beta-subunit-like polypeptide which is a member of the WD repeat protein family. WD repeats are minimally conserved regions of approximately 40 amino acids typically bracketed by gly-his and trp-aspartic acid (GH-WD), which may fa... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                              |
| Molecular Weight           | 36kDa                                                                                                                                                                                                                                                                   |
