| Category                   | Sonstiges                                                                                                                                                                                                                                                   |
| Application                | FISH                                                                                                                                                                                                                                                        |
| Species Reactivity         | Human                                                                                                                                                                                                                                                       |
| Product Description        | Labeled FISH probes as chromosomal markers using Fluorescent In Situ Hybridization Technique. ( <a href="#">Technology</a> )....                                                                                                                            |
| Application Dilute         | The probe is provided in 5x concentrated format, to allow mixing of up to 5 chromosome FISH probes in a single hybridization assay. When used alone, it should be diluted to 1x with FISH Hybridization Buffer (Cat &a href=http://www.abnova.com/products/ |
