| Category                   | Sonstiges                                                                                                                                                                                                                                                                                                     |
| Application                | FISH                                                                                                                                                                                                                                                                                                          |
| Species Reactivity         | Human                                                                                                                                                                                                                                                                                                         |
| Product Description        | Labeled FISH probes for identification of subtelomere aberrations using Fluorescent In Situ Hybridization Technique. ( <a href="#">Technology</a> )....                                                                                                                                                       |
| Application Dilute         | The probe is provided in 5x concentrated format, to allow mixing of up to 5 Subtelomere FISH Probes in a single hybridization assay. When used alone, it should be diluted to 1x with FISH Hybridization Buffer ( <a href="http://www.abnova.com/products">Cat &amp;a href=http://www.abnova.com/products</a> |
