| Immunogen                  | Recombinant fragment (126 Amino acid residues between aa 1-200) of human TRIM29 protein                                                                                                                                                                       |
| Product Description        | This antibody recognizes a 66 kDa protein, which is identified as Tripartite motif-containing protein 29 (TRIM29). It interacts with the intermediate filament protein vimentin, a substrate for the PKC family of protein kinases, and with hPKCI-1, an i... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
