| Immunogen                  | Mouse recombinant p27 protein (DCS-72.F6), Recombinant human CDKN1B protein (KIP1/769)                                                                                                                                                                        |
| Product Description        | Recognizes a 27 kDa protein, identified as the p27/Kip1, a cell cycle regulatory mitotic inhibitor. Its epitope spans between aa 83-204 of p27. It is highly specific and shows no cross-reaction with other related mitotic inhibitors. p27/Kip1 function... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.2 mg/mL                                                                                                                                                                                                                                                     |
