| Immunogen                  | Recombinant human full-length CFTR                                                                                                                                                                                                                            |
| Product Description        | This antibody recognizes a protein of 165-170 kDa, identified as cystic fibrosis transmembrane conductance regulator (CFTR). CFTR is composed of two membrane-spanning domains (MSD), two nucleotide-binding domains (NBD), and an R domain. It is structu... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
