| Immunogen                  | Human peripheral lymphocytes                                                                                                                                                                                                                                                   |
| Product Description        | Recognizes a protein of 32 kDa, identified as CD8a (also known as CD8 chain, T cell co-receptor, Leu2, and T8). CD8 molecule consists of two chains, termed $\alpha$ and $\beta$ chain, which are expressed as a disulphide-linked heterodimer or as an homodimer. CD8 is e... |
