| Immunogen                  | Human thyroid follicular cells                                                                                                                                                                                                                                |
| Product Description        | Thyroglobulin is a 660 kDa dimeric pre-protein with mutiple glycosylation sites. It is produced by and processed within the thyroid gland to produce the hormone thyroxine and triiodothyronine. Prior to forming dimers, thyroglobulin monomers undergo c... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 1 mg/mL                                                                                                                                                                                                                                                       |
| Clone Designation          | [r6E1]                                                                                                                                                                                                                                                        |
| Molecular Weight           | 660 kDa (Dimeric Form)                                                                                                                                                                                                                                        |
