| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Recombinant full-length human IGHA1 and IGHA2 proteins                                                                                                                                                                                                        |
| Product Description        | This MAb is specific to heavy chain of IgA and shows minimal cross-reaction with heavy chains of other immunoglobulins. It is reactive with all subclasses of Alpha heavy chain. Immunoglobulins are four-chain, Y-shaped, monomeric structures comprised ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 1 mg/mL                                                                                                                                                                                                                                                       |
| Clone Designation          | [rHISA43]                                                                                                                                                                                                                                                     |
| Molecular Weight           | 50-75 kDa                                                                                                                                                                                                                                                     |
