| Conjugation                | DyLight 405                                                                                                                                                                                                                                                   |
| Product Description        | Assay Biotechnology secondary antibodies are available conjugated to enzyme, biotin or fluorophore for use in a variety of antibody-based applications including Western Blot, ImmunoHistoChemistry, ImmunoFluorescence, Flow Cytometry and ELISA. We offe... |
| Source                     | Goat                                                                                                                                                                                                                                                          |
| Purity                     | Affinity purified using solid phase Rabbit IgG (H&L) with finally > 95% purity based on SDS-PAGE                                                                                                                                                              |
| Form                       | Liquid in PBS, pH 7.4, containing 0.02% Sodium Azide as preservative, 1% BSA as stablizer and 50% Glycerol.                                                                                                                                                   |

|                    |                                                                                                                                                                |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Dilute | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting 1:50-1:1000 dilutions for most fluorescent applications. |
