| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | FC, IF, WB                                                                                                                                                                                                                                                    |
| Species Reactivity         | Rabbit                                                                                                                                                                                                                                                        |
| Conjugation                | DyLight 800                                                                                                                                                                                                                                                   |
| Product Description        | Assay Biotechnology secondary antibodies are available conjugated to enzyme, biotin or fluorophore for use in a variety of antibody-based applications including Western Blot, ImmunoHistoChemistry, ImmunoFluorescence, Flow Cytometry and ELISA. We offe... |
| Source                     | Goat                                                                                                                                                                                                                                                          |
| Purity                     | Affinity purified using solid phase Rabbit IgG (H&L) with finally > 95% purity based on SDS-PAGE                                                                                                                                                              |
| Form                       | Liquid in PBS, pH 7.4, containing 0.02% Sodium Azide as preservative, 1% BSA as stablizer and 50% Glycerol.                                                                                                                                                   |

|                    |                                                                                                                                                                                       |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Dilute | Suggested starting 1:50-1:1000 dilutions for most fluorescent applications, while 1:5000-20000 dilutions for fluorescent assays with LI-1:COR Odyssey equipment would be recommended. |
