| Species Reactivity         | Human                                                                                                                                                                                                                                                                              |
| Product Description        | Herpesvirus entry mediator (HVEM) is a type I membrane protein in the TNF receptor superfamily, and it can both promote and inhibit T cell activity. HVEM is highly expressed on naive CD4+ T cells, CD8+ T memory cells, regulatory T cells, dendritic ce...                      |
| Molecular Weight           | 18.38 KDa                                                                                                                                                                                                                                                                          |
| NCBI                       | <a href="#">92956</a>                                                                                                                                                                                                                                                              |
| Purity                     | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                                                |
| Application Notes          | Always centrifuge tubes before opening.Do not mix by vortex or pipetting.It is not recommended to reconstitute to a concentration less than 100µg/ml.Dissolve the lyophilized protein in distilled water.Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
