| Category                   | Biochemikalien                                                                                                                                                                                                    |
| Product Description        | (S)-TCO-PEG3-NH2 is an ADC linker containing 3 PEG units. (S)-TCO-PEG3-NH2 can use its own TCO group to perform the inverse electron demand Diels-Alder reaction (iEDDA) with molecules with Tetrazine groups.... |
| Molecular Weight           | 344.45                                                                                                                                                                                                            |
| Formula                    | C17H32N2O5                                                                                                                                                                                                        |
| Target                     | ADC Linker                                                                                                                                                                                                        |
| Application Notes          | MCE Product type: ADC Related                                                                                                                                                                                     |
