| Manufacturer               | MedchemExpress                                                                                                                                                                                                                                                |
| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | CD40 Protein, the receptor for TNFSF5/CD40LG, transduces signals via TRAF6 and MAP3K8, activating ERK in macrophages and B cells, leading to immunoglobulin secretion. Existing as a monomer and homodimer, CD40 interacts with TRAF proteins (TRAF1, TRAF... |
| Molecular Weight           | Approximately 28-32 kDa, based on SDS-PAGE under reducing conditions.                                                                                                                                                                                         |
| Formula                    | 403469(Gene_ID)Q7YRL5 (E21-A194)(Accession)                                                                                                                                                                                                                   |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
