| Product Description        | hsa-miR-223-5p antagomirs are chemically-modified oligonucleotides that hybridize with mature miRNAs. The miRNA antagomirs have 2 phosphorothioates at the 5 end, 4 phosphorothioates at the 3 end, 1 cholesterol group at the 3 end, and full-length nucl... |
| Molecular Weight           | 7318.78                                                                                                                                                                                                                                                       |
| Target                     | MicroRNA                                                                                                                                                                                                                                                      |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                                                                                                                                                            |
