| Species Reactivity         | Mouse                                                                                                                                                                                                                                                         |
| Product Description        | This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse FAS/CD95. Standards or samples are added to the micro ELISA plate wells and combined with the specific... |
| Range                      | 31.25-2000pg/mL                                                                                                                                                                                                                                               |
| Sensitivity                | 18.75pg/mL                                                                                                                                                                                                                                                    |
| Samples                    | Serum, plasma and other biological fluids                                                                                                                                                                                                                     |
| Target                     | FAS/CD95                                                                                                                                                                                                                                                      |
