| Product Description        | In vivo fluorescence imaging uses a sensitive camera to detect fluorescence emission from fluorophores in whole-body living small animals. To overcome the photon attenuation in living tissue, fluorophores with long emission at the infrared (IR) regio... |
| Molecular Weight           | 1373.43                                                                                                                                                                                                                                                       |
