| Target Specificity         | IgG (H+L)                                                                                                                                                       |
| Cross-Adsorption (MinX)    | Bovine,Gallus,Goat,Guinea pig,Hamster<br>(syrian),Equine,Human,Rabbit,Sheep                                                                                     |
| Clonality                  | Polyclonal                                                                                                                                                      |
| Buffer                     | Buffer: 0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6. Stabilizer: 15<br>mg/ml Bovine Serum Albumin (IgG-Free, Protease-Free).<br>Preservative: 0.05% Sodium Azide |
| Purity                     | AffiniPure                                                                                                                                                      |

|                    |                                                                                                                                                                                                                                                                            |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Form               | Freeze-dried solid                                                                                                                                                                                                                                                         |
| Storage            | Storage and Rehydration: Store freeze-dried solid at 2-8°C. Rehydrate with the indicated volume of dH <sub>2</sub> O and centrifuge if not clear. Prepare working dilution on day of use. Product is stable for about 6 weeks at 2-8°C as an undiluted liquid. Extended... |
| Antibody Type      | Secondary Antibody                                                                                                                                                                                                                                                         |
| Application Dilute | _x000D_ Western Blot:- 1:50,000-200,000_x000D_ Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined...                |
