| Manufacturer               | Echelon Biosciences                                                                                                                                                                                                                                           |
| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Isoprenoid compounds are a diverse group of natural products which are essential components in all cells. Isoprenoids are biosynthesized from the simple precursors isopentenyl diphosphate (IPP) and dimethylallyl diphosphate (DMAPP). Eukaryotes, fungi... |
| Application Notes          | Categories: Biochemical Reagents. Related: MEP Pathway. Ship 1 : Shipping Temp. Ship 2: Gel Ice                                                                                                                                                               |
