| Product Description        | The GENLISA Human Phosphatidylinositol 3,4,5-Trisphosphate-Dependent Rac Exchanger 1 Protein (PREX1) ELISA includes features like: Ready to use protocol with break-apart wells for ease of use<br>Standardisation and High Reproducibility Lot to Lot Consis... |
| Range                      | 0.156 - 10 ng/ml                                                                                                                                                                                                                                                 |
| Sensitivity                | 0.05 ng/ml                                                                                                                                                                                                                                                       |
| Samples                    | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. For tear samples, please connect with us to discuss further.                                                                                               |
| Application Notes          | Colorimetric, Absorbance measured at 450nm                                                                                                                                                                                                                       |
