| Product Description        | The GENLISA Human Precursor Of Prostate Specific Antigen (PROPSA) ELISA includes features like: Ready to use protocol with break-apart wells for ease of use Standardisation and High Reproducibility Lot to Lot Consistency Accuracy and Precision Valida... |
| Range                      | 0.469 - 30 ng/ml                                                                                                                                                                                                                                              |
| Sensitivity                | 0.2 ng/ml                                                                                                                                                                                                                                                     |
| Samples                    | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. For tear samples, please connect with us to discuss further.                                                                                            |
| Application Notes          | Colorimetric, Absorbance measured at 450nm                                                                                                                                                                                                                    |
