| Product Description        | RayBio Human Immunoquantitative (PCR-Based) MOG ELISA Kit for cell culture supernatants, plasma, and serum samples.... |
| Range                      | 9.76 pg/mL - 40,000 pg/mL                                                                                              |
| Sensitivity                | 9.76 pg/mL                                                                                                             |
| NCBI                       | <a href="#">4340</a>                                                                                                   |
| Form                       | 96-well Microplate                                                                                                     |
| Samples                    | Cell Culture Supernatants, Plasma, Serum                                                                               |
| Target                     | MOG                                                                                                                    |
| Application Dilute         | 5 fold                                                                                                                 |
| Application Notes          | qPCR                                                                                                                   |
