| Product Description        | The RayBiotech CHO Host Cell Proteins (HCP) ELISA kit is an in vitro enzyme-linked immunosorbent assay for the quantitative measurement of process-related HCP impurities derived from production processes based on CHO (Chinese Hamster Ovaries) product... |
| Range                      | 1.25 ng/ml - 350 ng/ml                                                                                                                                                                                                                                        |
| Sensitivity                | 1.25 ng/ml                                                                                                                                                                                                                                                    |
| Form                       | 96-well Microplate                                                                                                                                                                                                                                            |
