| Category                   | Kits/Assays                                                                                                                                                                                                                    |
| Product Description        | Beta-Glucuronidase Activity Assay Kit provides a simple, reproducible, and sensitive tool of measuring the activity of beta-Glucuronidase in cell lysates, plasma, serum, urine, saliva and other biological liquid samples... |
| Sensitivity                | 0.05 $\mu$ U                                                                                                                                                                                                                   |
| Form                       | 96-well Microplate                                                                                                                                                                                                             |
| Samples                    | Cell Lysates, Plasma, Serum, Urine, Saliva                                                                                                                                                                                     |
| Target                     | Beta-Glucuronidase (GUSB)                                                                                                                                                                                                      |
| Application Notes          | Fluorometer                                                                                                                                                                                                                    |
