| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | Mouse                                                                                                                                                                                                                                                         |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Mouse FGF21. During the reaction, Mouse FGF21 in the sample or standard competes with a fixed amount of Mouse FGF21 on the solid ... |
| Range                      | 2.47-200pg/mL                                                                                                                                                                                                                                                 |
| Sensitivity                | 0.91pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | FGF21                                                                                                                                                                                                                                                         |
