| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | Porcine                                                                                                                                                                                                                                                       |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Porcine INHa. During the reaction, Porcine INHa in the sample or standard competes with a fixed amount of Porcine INHa on the sol... |
| Range                      | 12.35-1000pg/mL                                                                                                                                                                                                                                               |
| Sensitivity                | 5.16pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
