| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | All                                                                                                                                                                                                                                                           |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with 5-Me-THF. During the reaction, 5-Me-THF in the sample or standard competes with a fixed amount of 5-Me-THF on the solid phase sup... |
| Range                      | 1.11-90ng/mL                                                                                                                                                                                                                                                  |
| Sensitivity                | 0.42ng/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | 5-Me-THF                                                                                                                                                                                                                                                      |
