| Product Description        | AGO1 (Argonaute1) is a key protein in the RNA interference (RNAi) pathway. As a core component of the RNAinduced silencing complex (RISC), it binds to small noncoding RNAs like microRNAs (miRNAs) and short interfering RNAs (siRNAs). Unlike its close ... |
| Molecular Weight           | 99.1 kDa                                                                                                                                                                                                                                                      |
