| Category                   | Zellen/Zellkultur                                                                                                                                                                                                                                             |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | Amyloid precursor protein (APP) is a type I integral membrane protein ubiquitously expressed in many tissues and concentrated in the synapses of neurons. The majority of APP is cleaved at the plasma membrane by the alphasecretase in the nonamyloidoge... |
| Tag                        | GFP Tag                                                                                                                                                                                                                                                       |
| Form                       | Liquid                                                                                                                                                                                                                                                        |
| Target                     | APP                                                                                                                                                                                                                                                           |
| Application Notes          | Screening beta-secretase and gamma-secretase inhibitors which stops Abeta peptide formation.                                                                                                                                                                  |
