| Immunogen                  | Synthetic peptide. This information is considered to be commercially sensitive.                                                                                                                                                                                            |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                               |
| Product Description        | This gene encodes a protein that hydrolyzes purine nucleotide phosphoramidates substrates, including AMP-morpholidate, AMP-N-alanine methyl ester, AMP-alpha-acetyl lysine methyl ester, and AMP-NH <sub>2</sub> . The encoded protein interacts with these substrates ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                                 |
| Molecular Weight           | 14kDa                                                                                                                                                                                                                                                                      |
| NCBI                       | <a href="#">3094</a>                                                                                                                                                                                                                                                       |
