| Product Description        | The protein encoded by this gene is a member of the forkhead/winged-helix family of transcriptional regulators. Defects in this gene result in the scurfy phenotype (sf). Alternative splicing results in multiple transcript variants.... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                 |
| Concentration              | FC (intra)                                                                                                                                                                                                                                 |
