| Category                   | Antikörper                                                                                                                                                                                                                                              |
| Application                | ELISA, FACS, WB                                                                                                                                                                                                                                         |
| Species Reactivity         | Human, Mouse                                                                                                                                                                                                                                            |
| Immunogen                  | A portion of amino acids 807-837 from the human protein was used as the immunogen for this GCN5 antibody.                                                                                                                                               |
| Product Description        | KAT2A, or GCN5, is a histone acetyltransferase (HAT) that functions primarily as a transcriptional activator. It also functions as a repressor of NF-kappa-B by promoting ubiquitination of the NF-kappa-B subunit RELA in a HAT-independent manner.... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                              |
| UniProt                    | <a href="#">Q92830</a>                                                                                                                                                                                                                                  |
| Purity                     | Purified                                                                                                                                                                                                                                                |
| Form                       | In 1X PBS, pH 7.4, with 0.09% sodium azide                                                                                                                                                                                                              |
| Antibody Type              | Primary Antibody                                                                                                                                                                                                                                        |

|                    |                                                                                                                     |
|--------------------|---------------------------------------------------------------------------------------------------------------------|
| Application Dilute | Western blot: 1:1000,Flow Cytometry: 1:10-1:50                                                                      |
| Application Notes  | Titration of the GCN5 antibody may be required due to differences in protocols and secondary/substrate sensitivity. |
