| Immunogen                  | Raised against Vaccinia-E2 followed by intravenous injection of the maltose binding protein MBP-E2                                                                                                                                                            |
| Product Description        | The human papilloma virus (HPV) family of DNA tumor viruses includes HPV16, a strain that is responsible for the largest number of cases of cervical cancers linked to the family. HPV16E1 and HPV16E2 are proteins that are involved in the regulation of... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [TVG 261]                                                                                                                                                                                                                                                     |
| UniProt                    | Not Applicable                                                                                                                                                                                                                                                |
| Purity                     | Protein A/G affinity                                                                                                                                                                                                                                          |

|                    |                                                                                   |
|--------------------|-----------------------------------------------------------------------------------|
| Form               | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide           |
| Antibody Type      | Primary Antibody                                                                  |
| Application Dilute | Western blot: 1-2ug/ml                                                            |
| Application Notes  | Optimal dilution of the HPV16 E2 antibody should be determined by the researcher. |
