| Host                       | Mouse                                                                                                                                                                                                                                                          |
| Category                   | Antikörper                                                                                                                                                                                                                                                     |
| Application                | FACS, IF                                                                                                                                                                                                                                                       |
| Species Reactivity         | Human                                                                                                                                                                                                                                                          |
| Immunogen                  | Recombinant full-length human GTF2H2 protein was used as the immunogen for the BTF2 p44 antibody.                                                                                                                                                              |
| Product Description        | Initiation of transcription from protein-coding genes in eukaryotes is a complex process that requires RNA polymerase II, as well as families of basal transcription factors. Binding of the factor TFIID (TBP) to the TATA box is believed to be the first... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                     |
| Clone Designation          | [PCRP-GTF2H2-1B9]                                                                                                                                                                                                                                              |
| UniProt                    | <a href="#">Q13888</a>                                                                                                                                                                                                                                         |
| Purity                     | Protein A/G affinity                                                                                                                                                                                                                                           |

|                    |                                                                                   |
|--------------------|-----------------------------------------------------------------------------------|
| Form               | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide           |
| Antibody Type      | Primary Antibody                                                                  |
| Application Dilute | Flow cytometry: 1-2ug/million cells,Immunofluorescence: 1-2ug/ml                  |
| Application Notes  | Optimal dilution of the BTF2 p44 antibody should be determined by the researcher. |
