| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | FACS, IF                                                                                                                                                                                                                                                      |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Recombinant full-length human SWI/SNF complex subunit SMARCC1 protein was used as the immunogen for the SMARCC1 antibody.                                                                                                                                     |
| Product Description        | The SWI/SNF complex is involved in the activation of transcription via the remodeling of nucleosome structure in an ATP-dependent manner. Brm (also designated SNF1 or SNF2) are the ATPase subunits of the mammalian SWI/SNF complex. Brm, Brg-1, Ini1 (i... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [PCRP-SMARCC1-1F1]                                                                                                                                                                                                                                            |
| UniProt                    | <a href="#">Q92922</a>                                                                                                                                                                                                                                        |
| Purity                     | Protein A/G affinity                                                                                                                                                                                                                                          |

|                    |                                                                                  |
|--------------------|----------------------------------------------------------------------------------|
| Form               | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide          |
| Antibody Type      | Primary Antibody                                                                 |
| Application Dilute | Flow cytometry: 1-2ug/million cells,Immunofluorescence: 1-2ug/ml                 |
| Application Notes  | Optimal dilution of the SMARCC1 antibody should be determined by the researcher. |
