| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Conjugation                | CF568                                                                                                                                                                                                                                                         |
| Product Description        | Anti-Human IgG (Fc), rVHH (N2508.HFC) is a recombinant Alpaca VHH antibody that recognizes the Fc domain of human IgG, and is validated for IF and flow. Red fluorescent, STORM-compatible CF568 dye has Ex/Em at 562/583 nm. Unit size: 500 uL at 0.1 mg/... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 100 ug/mL                                                                                                                                                                                                                                                     |
| Clone Designation          | [N2508.HFC]                                                                                                                                                                                                                                                   |
| Buffer                     | PBS, 0.1% rBSA, 0.05% azide                                                                                                                                                                                                                                   |

| Source            | Animal                                                                                                                              |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Application Notes | Immunofluorescence: 0.1 ug/mL, Flow cytometry: 0.1 ug per million cells/0.1 mL, Optimal concentration to be determined by end-user. |
