| Species Reactivity         | Canine, Guinea pig, Human, Mouse, Rabbit, Rat                                                                                                                                                                                                                 |
| Immunogen                  | The immunogen is a synthetic peptide directed towards the N terminal region of human CNBP                                                                                                                                                                     |
| Product Description        | CNBP is a nucleic-acid binding protein with seven zinc-finger domains. The protein has a preference for binding single stranded DNA and RNA. The protein functions in cap-independent translation of ornithine decarboxylase mRNA, and may also function i... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molecular Weight           | 19 kDa                                                                                                                                                                                                                                                        |
| NCBI                       | <a href="#">7555</a>                                                                                                                                                                                                                                          |
