| Species Reactivity         | Bovine, Canine, Equine, Guinea pig, Human, Mouse, Porcine, Rabbit, Rat                                                                                                                                                                                        |
| Immunogen                  | The immunogen is a synthetic peptide directed towards the C terminal region of human HKR1                                                                                                                                                                     |
| Product Description        | HKR1 is one of the GLI-Kruppel family of human genes. Members of this family have similar H-C links, i.e., a conserved stretch of 9 amino acids connecting the C-terminal histidine of one finger to the N-terminal cysteine of the next. On the basis of ... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molecular Weight           | 75kDa                                                                                                                                                                                                                                                         |
