| Species Reactivity         | Bovine, Equine, Guinea pig, Human, Rabbit, Rat                                                                                                                                                                                                                |
| Immunogen                  | The immunogen is a synthetic peptide directed towards the C terminal region of human ADORA1                                                                                                                                                                   |
| Product Description        | The protein encoded by this gene is an adenosine receptor that belongs to the G-protein coupled receptor 1 family. There are 3 types of adenosine receptors, each with a specific pattern of ligand binding and tissue distribution, and together they reg... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molecular Weight           | 36kDa                                                                                                                                                                                                                                                         |
| NCBI                       | <a href="#">134</a>                                                                                                                                                                                                                                           |
