| Category                   | Sonstiges                                                                                                                                                                                                                                                     |
| Product Description        | The Per-Arnt-Sim (PAS) domain was identified as a 270 amino acid motif that mediates associations among various PAS family transcription factors. PAS domain family members include period proteins (Per1, Per2 and Per3), Arnt 1 (also designated HIF-1?)... |
| Concentration              | 1x10 <sup>10</sup> PFU/ml                                                                                                                                                                                                                                     |
| Buffer                     | DMEM, 2% BSA, 2.5% Glycerol                                                                                                                                                                                                                                   |
