Intelliscreen(TM) Wnt/beta-catenin (canonical) Mini-Library FBM-10-7305

Article Name	Intelliscreen(TM) Wnt/beta-catenin (canonical) Mini-Library
Biozol Catalog Number	FBM-10-7305
Supplier Catalog Number	10-7305
Alternative Catalog Number	FBM-10-7305-1LIBRARY
Manufacturer	Focus Biomolecules
Category	Sonstiges
Product Description	Comprises 12 inhibitors of the various components of the Wnt pathway...
Form	Supplied as DMSO solution 10mM
Application Notes	The Wnt/β-catenin pathway is a multi-component pathway primarily involved in embryonic development, adult tissue homeostasis, and cell proliferation. Wnt proteins (i.e Wnt1, Wnt3a, Wnt5a) mediate extracellular signals that activate Wnt membrane receptors Frizzled and LRP5/6. Once activated, these signals inactivate a β-catenin degradation complex allowing β-catenin to translocate to the nucleus where it binds to TCF enabling target gene transcription. Dysfunction in the Wnt/β-catenin pathway is implicated in various cancers, liver disease, ALS, Alzheimers disease, bone disease, and cardiovascular disease.
