| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Application                | ELISA                                                                                                                                                                                                                                                         |
| Species Reactivity         | All                                                                                                                                                                                                                                                           |
| Product Description        | This General Noradrenaline (NE) ELISA Kit is a precoated, Competitive Inhibition ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids ... |
| Range                      | 78.1-5000pg/mL                                                                                                                                                                                                                                                |
| Sensitivity                | 27.2pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target                     | General Noradrenaline (NE)                                                                                                                                                                                                                                    |
| Application Notes          | Assay Length: 3 hours. Experimental Method: Competitive Inhibition                                                                                                                                                                                            |
