| Category                   | Molekularbiologie                                                                                                                                                                                                                                                 |
| Product Description        | May have a role in the cell cycle. Source: Recombinant protein corresponding to aa2-104 from human ERH, fused to GST-Tag at N-terminal, expressed in E. coli. Molecular Weight: ~39.1kD Amino Acid Sequence:<br>SHTILLVQPTKRPEGRITYADYESVNECMEGVCKMYEEHLKRMNPN... |
| Molecular Weight           | 39.1                                                                                                                                                                                                                                                              |
| UniProt                    | <a href="#">P84090</a>                                                                                                                                                                                                                                            |
| Purity                     | 90% (SDS-PAGE)                                                                                                                                                                                                                                                    |
| Form                       | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                                |
