| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | In vitro, myelin basic protein (MBP) is a substrate for phosphorylation by several different protein kinases including MAPK, PKA, calmodulin-dependent protein kinase, PKC and phosphorylase kinase. Even highly specific protein kinases such as Raf1, ME... |
| Molecular Weight           | 1736.83                                                                                                                                                                                                                                                       |
| Purity                     | ~95%. Purified by HPLC.                                                                                                                                                                                                                                       |
| Form                       | Supplied as a white to off-white lyophilized powder.                                                                                                                                                                                                          |
